Huiju Park obtained his Ph.D. at Oklahoma State University with an expertise in functional apparel design. Dr. Park has participated in multiple funded multidisciplinary research projects aiming to improve the mobility and thermal comfort of personal protective clothing system including ballistic body armor, chemical and biological protective clothing, and firefighters' bunker gear over the years. He has focused on **wearable technology**, biomechanical and physiological evaluation of **personal protective clothing system** and **sports apparel** by exploring the advantages of the latest human performance simulation technologies such as motion capture and thermal manikin systems. His professional career as an **sports apparel & footwear manager at PUMA Korea**, endowed him with broad knowledge of ergonomic design features and technologies to improve mobility, comfort & athletic performance.

He has published **36 peer-reviewed journal papers** in various research journals including Applied Ergonomics (Impact factor: 3.66), Ergonomics (Impact factor: 2.76), Energy and Buildings (Impact factor: 4.49), Fashion and Textiles (Impact factor: 2.54), Clothing and Textile Research Journal (Impact factor: 1.9), Textile Research Journal (Impact factor: 1.82), and AATCC Journal of Research (Impact factor: 1.12). He also published **10 refereed full papers** (6-10 pages) at major international conferences.

Dr. Park secured about **\$1.96 Million Research Funding (direct award to Park)** from 25 selected proposals (**total funding awarded** to selected projects: **\$8.5 Million**) various agencies and industry partners including the Department of Energy, USDA (US Department of Agriculture), US Air Force, NASA, Environmental Protection Agency, and Combating Terrorism Technical Support Office.

He also **co-invented 7 different items of smart clothing, shoes and wearable sensors** which were developed in his active collaboration of his graduate students and other Cornell faculty members (4 patented and 3 patent application under review). His research, teaching and creative design scholarship won **Awards from international conferences and design competitions:**

*2021 Best Brief Award at the International Symposium of Wearable Computers,*

He has taught **Fashion CAD, 3D Virtual Fashion Design, Functional Clothing, Sportswear and Smart Clothing Design and Programming** at Cornell University. Through his teaching and mentoring, many undergraduate students and graduate students experienced success in various international conferences and design competitions. **Examples of students' work** from his classes, and **Examples of students' success** (including best research paper awards, patents, design awards, juried

exhibitions, and fellowships) from his teaching and mentoring, are highlighted with a few links to video clips on **pages 20 through 23 in this CV**. Dr. Park's effective pedagogy was also recognized by ITAA (International Textile and Apparel Association) which is the world largest professional and academic organization in the fields of textile and apparel. At the 2021 ITAA Conference, his pedagogy was selected as the **winner of Second Place of Nancy Rutherford Teaching Innovation Award**. This award was the recognition of his dedication and effective pedagogy to increase students' motivation and engagement level during the pandemic. He applied "Nudge theory" to his teaching during the pandemic to increase students' engagement and motivation, overcoming limitations imposed by the pandemic.
